---

## PROFESSIONAL INTRODUCTION/SUMMARY

---

Software Engineer with hands-on experience in backend development, cloud microservices, and object-oriented programming. Former U.S. Army Network Communication Systems Specialist with 11+ years managing secure communications and network infrastructure valued over \$1M. Known for disciplined leadership and technical precision; seeking opportunities to contribute to innovative software engineering teams.

---

## EDUCATION / CERTIFICATION

---

**B.S. Software Engineering** May 2026

Arizona State University / Tempe, AZ

**CompTIA Security+ (SY0-701)** May 2025 – May 2028

**CompTIA Security+ (SY0-601)** Nov 2021 – Nov 2024

**Active Secret Security Clearance**

---

## TECHNICAL SKILLS

---

**Languages:** Java, JavaScript, Python, C, Bash

**Frameworks & Tools:** Node.js, React, Tailwind CSS, Docker

**Databases & OS:** PostgreSQL, Git, GitHub, Windows, Linux/Unix

**Methodologies:** Agile/Scrum

**Core Strengths:** Problem-Solving, Technical Troubleshooting, Team Leadership, Object-Oriented Programming

---

## PROJECTS

---

**J.A.T. – Job Application Tracker (Java Program) | Personal Project** May 2026

- Developed full-stack Java application with CSS-based UI customization
- Implemented object and file manipulation system for local data storage

**FAMAR (Web Application) | Group Capstone Project** Fall 2025 – May 2026

- Collaborated with 5-member team and sponsor to build KPI dashboard
- Utilized Python, React JS, Tailwind CSS, Docker, and PostgreSQL

- Implemented responsive UI components and backend data integration

**NOTABLE AWARDS**

---

- Army Commendation Medal (1)
- Army Good Conduct Medal (3)
- Army Achievement Medal (11)

**PROFESSIONAL EXPERIENCE**

---

**US Army, Fort Bragg, NC: Network Communication Systems Specialist** Jun 2022 – May 2025

- Served as a Communications Relay Group supervisor to a group containing 15 employees that improved company efficiency and range by 80%
- Trained and developed junior employees to progress in their careers and become more knowledgeable and versatile in the workplace
- Built independent software for the workplace which improved employee readiness by 30% resulting in less relocation infractions

**US Army, Camp Humphreys, South Korea: IT Service Desk Representative** Dec 2020 – Jun 2022

- Selected as team lead to conduct support tasks and operations to over 5,000 customers
- Supervised the resolution of more than 400 service requests and assisted in maintaining 98% network health that supported over 2,500 employees

**US Army, Fort Bragg, NC: Nodal Network Systems Operator/Maintainer** Sep 2017 – Dec 2020

- Installed, configured, and maintained encryption devices to provide secure communication between multiple operating systems through line-of-sight antenna and radio equipment
- Designed and implemented a robust communication network that integrated stand-alone relay stations, enabling a significant increase in coverage capabilities for Patriot systems and improving system responsiveness across vast operational areas.

**US Army, Fort Bliss, TX: Nodal Network Systems Operator/Maintainer** Nov 2014 – Sep 2017

- Facilitated network communications as a communication specialist on a 3-person team that operated and monitored a missile system, including radar, target identification, and command and control systems
- Managed and stored over \$1M of the company's encryption devices, radios, monitors, and computers
- Award given for efficiency and knowledge, exceeding standards and expectations
